Government budget decisions – what taxes to levy, what services to provide, and how much debt to take on – have important consequences for all people in society. When governments provide information and meaningful channels for the public to engage in these decisions, we can better ensure public money is spent on public interests.

The Open Budget Survey (OBS) is the world’s only independent, comparative and fact-based research instrument that uses internationally accepted criteria to assess public access to central government budget information; formal opportunities for the public to participate in the national budget process; and the role of budget oversight institutions, such as legislatures and national audit offices, in the budget process.

The survey helps local civil society assess and confer with their government on the reporting and use of public funds. This 9th edition of the OBS covers 125 countries.

Visit www.internationalbudget.org/open-budget-survey for more information, including the full OBS methodology, the 2023 Global Report, findings for all surveyed countries, and the Data Explorer.
Transparency

This part of the OBS measures public access to information on how the central government raises and spends public resources. It assesses the online availability, timeliness, and comprehensiveness of eight key budget documents using 109 equally weighted indicators and scores each country on a scale of 0 to 100. A transparency score of 61 or above indicates a country is likely publishing enough material to support informed public debate on the budget.

South Africa has a transparency score of 83 (out of 100).

<td>76</td>
</tr>
</tbody>
</table>

South Africa’s transparency score of **83** in the OBS 2023 is near its score in 2021.
Recommendations

South Africa should prioritize the following actions to improve budget transparency:

- Improve the comprehensiveness of the Enacted Budget.
Public Participation

The OBS assesses the formal opportunities offered to the public for meaningful participation in the different stages of the budget process. It examines the practices of the central government’s executive, the legislature, and the supreme audit institution (SAI) using 18 equally weighted indicators, aligned with the Global Initiative for Fiscal Transparency’s Principles of Public Participation in Fiscal Policies, and scores each country on a scale from 0 to 100.

South Africa has a public participation score of 35 (out of 100).

Extent of opportunities for public participation in the budget process

Formulation (executive) 40 /100
Approval (legislature) 67 /100
Implementation (executive) 17 /100
Audit (supreme audit institution) 33 /100

KEY
0 -40: Few
41-60: Limited
61-100: Adequate

Recommendations

South Africa's National Treasury has established e-consultation during budget formulation and e-consultations during budget implementation but, to further strengthen public participation in the budget process, should also prioritize the following actions:

- Expand mechanisms during budget implementation to engage any civil society organization or member of the public who wishes to participate.
- Actively engage with vulnerable and underrepresented communities, directly or through civil society organizations representing them.

South Africa's Parliament has established submissions related to the approval of the annual budget, but should also prioritize the following actions:

- Allow any member of the public or any civil society organization to testify during its hearings on the budget proposal prior to its approval.
- Allow members of the public or civil society organizations to testify during its hearings on the Audit Report.

South Africa's Auditor-General has established mechanisms to contribute to relevant audit investigations. It should prioritize the following actions to improve public participation in the budget process:

- Establish formal mechanisms for the public to assist in developing its audit program.
Budget Oversight

The OBS examines the role that legislatures and supreme audit institutions (SAIs) play in the budget process and the extent to which they provide oversight; each country is scored on a scale from 0 to 100 based on 18 equally weighted indicators. In addition, the survey collects supplementary information on independent fiscal institutions (see Box).

The legislature and supreme audit institution in South Africa, together, provide adequate oversight during the budget process, with a composite oversight score of 76 (out of 100). Taken individually, the extent of each institution’s oversight is shown below:

![Legislative oversight](chart1)

![Audit oversight](chart2)

<table>
<thead>
<tr>
<th>KEY</th>
<th>0-40: Few</th>
<th>41-60: Limited</th>
<th>61-100: Adequate</th>
</tr>
</thead>
</table>

**Recommendations**

South Africa’s Parliament provides limited oversight during the planning stage of the budget cycle and adequate oversight during the implementation stage. To further improve oversight, the following actions should be prioritized:

- The Executive’s Budget Proposal should be submitted to legislators at least two months before the start of the budget year.
- The legislature should approve the Executive’s Budget Proposal before the start of the budget year.
- In practice, ensure the legislature is consulted before the executive spends any unanticipated revenue.
The emerging practice of establishing independent fiscal institutions

South Africa’s independent fiscal institution (IFI) is the Parliamentary Budget Office. Its independence is set in law, and it reports to the legislature. It publishes an assessment of the official macroeconomic and fiscal forecasts produced by the executive and its cost estimates of some new policy proposals.

*The indicators on IFIs are not scored in the Open Budget Survey.*
Methodology

- Only documents published and events, activities, or developments that took place through 31 December 2022 were assessed in the OBS 2023.

- The survey is based on a questionnaire completed in each country by an independent budget expert:
  Jay Kruuse
  Rhodes University - Public Service Accountability Monitor (PSAM)
  Grahamstown, South Africa
  j.kruuse@ru.ac.za

- To further strengthen the research, each country’s draft questionnaire is also reviewed by an anonymous independent expert, and in South Africa by a representative of the National Treasury.
