Change in Transparency Over Time

Regional Comparison

Usefulness of Budget Information Throughout the Budget Cycle

Georgia’s score of 66 out of 100 is substantially higher than the global average score of 45.
The Availability of Budget Documents Over Time

Georgia’s score of 66 on the 2015 Open Budget Index is substantially higher than its score in 2012. However, the Government of Georgia has been inconsistent in which documents are made publicly available in a given year.

Since 2012, the Government of Georgia has increased the availability of budget information by:

- Publishing the Citizens Budget, In-Year Reports, and Year-End Report.

However, the Government of Georgia has failed to make progress in the following ways:

- Not producing and publishing a Mid-Year Review.

Evidence suggests that transparency alone is insufficient for improving governance, and that public participation in budgeting can maximize the positive outcomes associated with greater budget transparency.

To measure public participation, the Open Budget Survey assesses the degree to which the government provides opportunities for the public to engage in budget processes. Such opportunities should be provided throughout the budget cycle by the executive, the legislature, and the supreme audit institution.

Regional Comparison

Georgia’s score of 46 out of 100 indicates that the public is provided with limited opportunities to engage in budget processes. This is higher than the global average score of 25.
The Open Budget Survey examines the extent to which legislatures and supreme audit institutions are able to provide effective oversight of the budget. These institutions play a critical role – often enshrined in national constitutions – in planning budgets and overseeing their implementation.

**Oversight by the Legislature**

The legislature provides adequate oversight during the planning stage of the budget cycle and adequate oversight during the implementation stage of the budget cycle. However, in both law and practice, the legislature is not consulted prior to spending contingency funds that were not identified in the Enacted Budget.

**Oversight by the Supreme Audit Institution**

The supreme audit institution provides adequate budget oversight. Under the law, it has full discretion to undertake audits as it sees fit. Moreover, the head of the supreme audit institution cannot be removed without legislative or judicial approval, which bolsters its independence. Finally, the supreme audit institution is provided with sufficient resources to fulfill its mandate and has an adequate quality assurance system in place.

**RECOMMENDATIONS**

**Improving Transparency**

Georgia should prioritize the following actions to improve budget transparency:

- Produce and publish a Mid-Year Review.
- Increase the comprehensiveness of the Executive’s Budget Proposal by, for example, presenting verifiable (quantitative) output and outcome indicators in the program budget appendix that can help measure deliverables in the subprograms and their impact over the period of four years.
- Increase the comprehensiveness of the Year-End Report.

**Improving Participation**

Georgia should prioritize the following actions to improve budget participation:

- Establish credible and effective mechanisms (i.e., public hearings, surveys, focus groups) for capturing a range of public perspectives on budget matters.
- Ensure the public is informed of the purpose of public budget engagements and provided with sufficient information to participate effectively.
- Provide detailed feedback on how public assistance and participation has been used by the supreme audit institution.

**Improving Oversight**

Georgia should prioritize the following actions to strengthen budget oversight:

- In both law and practice, ensure the legislature is consulted prior to the spending of contingency funds that were not identified in the Enacted Budget.
The Open Budget Survey uses internationally accepted criteria developed by multilateral organizations such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD), and the International Organisation of Supreme Audit Institutions (INTOSAI). It is a fact-based research instrument that assesses what occurs in practice through readily observable phenomena. The entire research process took approximately 18 months between March 2014 and September 2015 and involved about 300 experts in 102 countries. The Survey was revised somewhat from the 2012 version to reflect emerging developments in accepted good practice and to strengthen individual questions. A full discussion of these changes can be found in a technical note on the comparability of the Open Budget Index over time (see below).

Survey responses are typically supported by citations and comments. This may include a reference to a public document, an official statement by the government, or comments from a face-to-face interview with a government official or other knowledgeable party.

The Survey is compiled from a questionnaire completed for each country by independent budget experts who are not associated with the national government. Each country’s questionnaire is then independently reviewed by an anonymous expert who also has no association to government. In addition, IBP invites national governments to comment on the draft results from the Survey and considers these comments before finalizing the Survey results.

The Government of Georgia provided comments on the draft Open Budget Questionnaire results.
